

Split Ferrite Cores suitable for the shortwave range

Fair-Rite part number 0431176451, Material 31

(see data sheet in separate file)

As you see there, these cores have a very nice attenuation, if you use 2 or 3 turns, which is possible, as the inner diameter of the core is about 18 mm.

Sources:

Farnell part no. 1703119

Mouser part no. 623-0431176451

Digikey part no. 1934-1264-ND

These distributors deliver free of charge if your order is above approx. 60 Euros, that is about 10 split cores at current prices.

But be careful, only if the package is not too heavy, because parts are shipped by UPS/DHL/FEDEX.

Therefore I normally buy them in order of 50 or 60 pieces.

60 pcs is also a full manufacturer's box.
